1/22/03
(new claims added)

Please cancel claims 1, 2, 3, 4 and 10.

Please add new claim 11.

81 11. A new and improved skylight conduit for conducting light and air into a room, comprising;

a roof mounted skylight having a dome in the roof of a building aperture and capable of receiving light from said roof;

a ceiling mounted fixture for mounting in a ceiling aperture and capable of conveying light to the inside of a room;

a flexible light and air conducting tube capable of bending to connect said skylight to said ceiling mounted,

where said flexible light and air conducting tube has a reflective inner wall, an insulated center core and a fire retardant outer wall;

said reflective inner wall being a metallized plastic and (said reflective inner wall being constructed of an air bubble material,) and;

said fire retardant outer wall is a metal foil to provide fire retardant qualities and strength to support the weight of the flexible light and air conducting tube.
